COMPUTER INFORMATION SYSTEM FRESH GRADUATE

Information systems graduate who obtained a certificate in E-Systems Development track. with proficiency in web development, database, UX/UI design, and software analysis. My experience coupled with my quick learning and application of new knowledge, qualify me for technical roles related to information systems. I'm excited to bring my hardworking attitude and technical skills to contribute to the organization's success.

EXPERIENCE

WOW Digital Information Technology - Summer Internship   **Jun 2022 - Aug 2022**

Dealing with real stakeholders by analyzing real projects, collecting the requirements, creating flow charts, designing the system, designing the user interface, and ending with the implementation of the ERP system.

College & Personal Projects   **Jan 2019 - Present**

I've worked on several projects during my college studies, including software testing, SQL databases, and networking using CISCO Packet Tracer. I am also currently learning UX/UI design and web development, and have started working on personal projects which I have uploaded to my GitHub repository.

Graphic Designer - Freelancer & Volunteer   **Jan 2019 - 2022**

Using my free time as a freelance graphic designer to design logos for companies or individuals and design social media posts in a creative way. I also worked on the sports committee at our college as a head graphic designer of the committee.

EDUCATION

King Abdulaziz University - Faculty of Computing and Information Technology   **2023**
Bachelor of Computer Information System

Al-Thagar Typical School   **2018**
High School Natural Sciences

PROJECTS

Graduation project   **Des 2022 - Mar 2023**

Is a user-friendly platform that helps students with their senior projects and finds compatible supervisors. The platform is also dedicated to partnering with technology companies to integrate new ideas and help students develop skills that will benefit them in the future.
Tools**:** PHP · MYSQL · Laravel · Bootstrap · HTML · CSS · JavaScript · Figma · LaTeX

My portfolio website   **Jul 2023 - July 2023**
Tools: PHP · MYSQL · Laravel · Bootstrap · Figma

Student Projects helper platform   **Feb 2022 - Mar 2022**

This website helps students improve their projects by showcasing previous work from different colleges. Students can contribute their own projects and users can view and comment on them without registering, but need to register to upload their own projects.
Tools: HTML · CSS · JavaScript · MS SQL
